## Work experience

Oct 2016 - Present **Freelance Web Developer**

**BigWork**

BigWork is based in Limerick city. They specialise in WordPress theme and plugin development. I'm currently working with them on a site by site basis building one off custom WordPress themes. Examples can be seen on my portfolio site.

Frb 2016 - Oct 2016 **Senior Web Developer**

**Go2Web**

Go2Web is a Dublin based web company. My Job here was mostly HTML, CSS, JavaScript and PHP coding. I also got some exposure to the Drupal CMS and Python. Some of the work I completed while there includes:

- Building a fund raising system for a charity that needed to integrate with their current Drupal site. The system allows users to view lights on a tree, sponsor a light(s), search for lights using an Ajax search function and sends a customized card (jpg) via email to the customer which contains a thank you message. The jpg was built using PHP. The system can be seen [here](#)
- A WordPress Plugin that when installed added a quotation form to a site. The plugin adds fields to the WordPress Dashboard allowing a user to edit the price of various items. The form was built using HTML, CSS, JavaScript and PHP. The form was unique so all elements were built by me including the form validation and security. The form can be seen [here](#)
- An eCommerce application for a huge historical photo archive. The site provides a preview of products depending on what options a user selects. Users can select an image and try different frames on that image or select multiple images and using a drag and drop feature, choose the order the images appear in the frame. Try it [here](#)

Mar 2014 - Sept 2015 **Junior Web Developer**

**Acton Web**

In March of 2014 I took a junior developer position at ActonWeb in Ennis Co. Clare.

- Built WordPress themes and plugins using CSS, HTML, JavaScript and PHP
- Reviewed and tested all of Actons sites. I checked for JavaScript errors, HTML5 Validation, browser/device compatibility, functionality errors and site speed
- I managed the development of most projects. This involved finding solutions to problems the developers were having and communicating with developers all over the world

Skills from this job include WordPress Theme Development, WordPress Plugin Development, Magento, PHP, MySQL and jQuery.

Nov 2012 - Feb 2014 **Web Developer/Designer**

**Baker Media**

Baker Media is a web design company based in Co. Limerick. I was one of a team of three. The junior designer/developer position I held there allowed me to get a good feel for the industry. Key skills include WordPress, HTML, CSS and JavaScript.
